

## SOMERSET WASTE PARTNERSHIP - RECYCLING END-USE REGISTER 2016/17

**In 2016/17 Somerset residents reused and recycled 128,154 tonnes of waste. This saved an estimated 122,638 tonnes of carbon emissions. 96% was recycled in the UK, with only 4% sent overseas for recycling. By reusing and recycling their waste, Somerset residents avoided paying over £13.5 million in landfill costs.**

The tables below detail the materials collected in 2016/17 by Somerset Waste Partnership's kerbside collections and recycling sites, together with materials collected by third parties on which the SWP paid Recycling or Reuse Credits. The table shows the tonnages of materials collected, the reprocessor and the final end use of materials. Also shown are estimates of the carbon saved (Carbon Dioxide equivalent) by recycling and reuse, which have been calculated using carbon saving factors from life cycle analysis studies provided by DEFRA (<http://www.defra.gov.uk/publications/2012/05/30/pb13773-2012-ghg-conversion/>), Resource Futures ([www.resourcefutures.co.uk](http://www.resourcefutures.co.uk)) and WRAP ([www.wrap.org.uk](http://www.wrap.org.uk)).

**ENVIRONMENTAL BENEFITS OF RECYCLING** - Recycling reduces carbon emissions, both by saving energy in extraction and manufacturing processes and by avoiding the powerful greenhouse gas (methane) emitted from landfilled biodegradable waste, such as paper and food. Recycling also leads to other environmental benefits, such as conserving natural resources from forestry and mining and reducing other forms of pollution.

**DISPOSAL** - Currently the majority of waste for disposal is sent to landfill at Broadpath, Dimmer and Walpole landfill sites. Rubbish sent to landfill sites costs Somerset tax payers over £12.5m every year, much of which could be saved by recycling.

**EXPORTS** - Somerset Waste Partnership prefers its recycling contractors to supply local UK markets, but it can be more economic to export some materials overseas. For example, demand to reuse clothing is much stronger in developing countries than in the UK. In 2016/17, some of our paper, cardboard, cans and plastic bottles were exported for recycling. A study commissioned by WRAP ([www.wrap.org.uk](http://www.wrap.org.uk)) found the energy and carbon savings from recycling still out-weighed, by at least 3 to 1, the energy use and carbon emissions from shipping overseas. The situation is further improved as the container ships used would otherwise return empty, after delivering goods manufactured in countries such as China to the UK.

**SOMERSET WASTE PARTNERSHIP** manages waste and recycling services on behalf of all local authorities in Somerset: Mendip District Council, Sedgemoor District Council, Somerset County Council, South Somerset District Council, Taunton Deane Borough Council and West Somerset Council.
